Supply List for Accelerated Physics:

- **Folder and/or binder and/or notebook.** You will need a system to keep materials and notes neatly organized. Having student Chromebooks, most information will be distributed electronically with limited paper handouts. A folder should keep these handouts organized. If you prefer taking notes on paper, have a binder and/or notebook for class. When submitting written work through Google Classroom, upload clear pictures of your work.

- **Scientific calculator:** If purchasing, the suggested model is TI 30X IIS. If you already own another model of scientific calculator, it should also work for class as long as you are familiar how to execute basic functions such as exponents, square roots, sine, cosine, tangent, etc.

- **Dry erase markers (OPTIONAL)**
  When participating in lab, students are often expected to present their results to their peers using a whiteboard. Basic color dry erase markers will be available in the classroom. If the student would like additional colors, the student must provide their own.
